

## MERROW Aquaneers

Education, Research, Recovery

Hello!

We want to thank you for your interest in the MERROW Aquaneers, the volunteer science diving group of Seahorse Coastal Consulting. Being active members of Aquaneers will allow you and your child opportunities to establish new relationships, learn and apply scientific principles, and take part in rare and exciting experiences.

Along with this letter, we have provided you with answers to some frequently asked questions. Admittedly, there are several steps that need to be taken in order to dive with MERROW, and we will do everything we can to help. We will provide all the forms and information necessary to make the process as easy as possible. If you decide to become a member you should use our easy-to-follow new member checklist. It's like a seasoned Aquaneer parent hanging right on your refrigerator.

And obviously, if you need more, there are many people you can turn to for help and information —any of our chapter presidents or dive safety officers, and all the other parents and nauts besides, will be happy to assist you. Once again, thanks for your interest and we look forward to seeing you at our next dry meeting!

Sincerely,

*Your New Membership Team*
